Here at Hana Tropicals, we take

great pride in our beehives and the care we lavish on our bees. We need our bees to pollinate our beautiful flowers, and in turn we do everything we can to provide them with a 'loving' home.

In the last few years we have developed products from their abundant wax and honey, and are proud to offer these products to our customers under the Hana Tropicals' 'Jungle Bee' logo. Learn about the benefits of beeswax and honey right here, and then make sure to add some hand salve or beard balm to your cart!

Announcing Our New Moringa Team!

We are so excited to welcome long term workers Kate & Makena as our **permanent** Moringa team! These two are working hard to create new Moringa products and to expand the reach of Hana Tropicals' products throughout Maui and of course, our website.

We strive to deliver the highest quality, sustainably-sourced Moringa products to you, and are always looking for ways to improve.

We are excited to be transitioning to a new logo and updated label soon, as well as switching to more sustainable and compost-able packaging that will maximize the shelf life and nutritional content of our Moringa products.

Expect to see our Moringa powder, tea, and soap products with a fresh new look soon!

[All Moringa Products](#)

Moringa is an ancient Superfood, also known as the “miracle plant.” The leaves of the Moringa trees are recognized as some of the most nutrient-dense leaves in the world, and can be used as a dietary supplement or applied topically. The leaves of the Moringa tree are packed with vitamins and minerals, and can help improve digestive health, maintain healthy cholesterol levels, boost the immune system, and reduce inflammation. Our products are held to an organic standard, so all our Moringa trees are lovingly tended with natural farming practices, without harming the surrounding environment or our team.

Hana Tropicals Sustainable Practices

Hana Tropicals is proud to announce our move towards solar dehydration and eco-friendly packaging to match

our farming practices. As our regular customers know, we always use recyclable cardboard and newspaper shred to ship our flowers, but we are working towards creating even less waste throughout our flower harvest and packaging process.

Thank you for being with us
on this journey!
